Единый государственный экзамен по АНГЛИЙСКОМУ ЯЗЫКУ

Инструкция по выполнению работы

Экзаменационная работа по английскому языку состоит из четырёх разделов («Аудирование, «Чтение», «Грамматика и лексика», «Письмо»), включающих в себя 40 заданий.

На выполнение экзаменационной работы отводится 3 часа (180 минут).

Ответы к заданиям 3–9, 12–18 и 32–38 записываются по приведённому ниже <u>образцу</u> в виде одной цифры, которая соответствует номеру правильного ответа. Эту цифру запишите в поле ответа в тексте работы, а затем перенесите в бланк ответов № 1.

Раздел 4 («Письмо») состоит из 2 заданий (39 и 40) и представляет собой небольшую письменную работу (написание личного письма и письменного высказывания с элементами рассуждения). В бланке ответов № 2 укажите номер задания и запишите ответ к нему.

Все бланки ЕГЭ заполняются яркими чёрными чернилами. Допускается использование гелевой или капиллярной ручки.

При выполнении заданий можно пользоваться черновиком. Записи в черновике, а также в тексте контрольных измерительных материалов не учитываются при оценивании работы.

Баллы, полученные Вами за выполненные задания, суммируются. Постарайтесь выполнить как можно больше заданий и набрать наибольшее количество баллов.

Желаем успеха!

A. The Royal Botanic Gardens, Kew, usually known as Kew Gardens, in Richmond upon Thames is a major London tourist attraction and a UNESCO Word Heritage site. It is located in south-west London and houses the largest and most diverse botanical and mycological collections in the world.

B. Founded in 1759, Kew began as a royal garden attached to the Royal Kew Palace, home to George III and his many children. The Palace is now open to visitors, but probably the buildings most visitors come to see are the incredible glasshouses. The Palmhouse is one of the largest surviving Victorian glasshouses in the world, with over 16,000 panes of glass. The Waterlily House, which contains some of the world's largest (and smallest) waterlilies, is also not to be missed.

C. However, Kew is more than just a garden and green space in the heart of Britain's capital city. The Royal Botanic Gardens, Kew covers approximately three hundred acres of land, and attracts around a million visitors every year. Its collections and laboratories illustrate the important part that plants play in our lives, and highlight the need to protect and conserve them for the benefit of generations to come. Ensuring environment and biodiversity protection is one of Kew's most important goals.

D. Kew is a vital research and scientific base, with multiple research projects and partnerships stretching across the globe. A world leader in plant science, Kew employs around seven hundred people, and is home to about nineteen thousand species of living plants. Its Millennium Seed Bank at Wakehurst Place, West Sussex holds seeds from around ten percent of the world's plant species for the benefit of humankind, curating around two billion seeds from 28,000 species of plants sourced from approximately 130 countries.

- E. Around eighty percent of our daily calorie intake comes from just twelve plant species. Kew's Millennium Seed Bank's Adapting Agriculture to Climate Change project recognises the need for greater genetic diversity in our crops and seeks to preserve food security for future generations. The project collects seeds from the wild relatives of some of our most important food crop plants whose genetic makeup can be used to breed new and useful traits back into modern agricultural crops so that they can better adapt to future climates and other threats, such as pests and diseases.
- F. The gardens have their own police force, Kew Constabulary, which has been in operation since 1847. Formerly known as the Royal Botanic Gardens Constabulary, it is a small, specialised constabulary of two sergeants and 12 officers, who patrol the grounds in a marked silver car. The Kew Constables are attested under section 3 of the Parks Regulation Act 1872, which gives them the same powers as the Metropolitan Police within the land belonging to the gardens.
- G. If you have never been to Kew Gardens, you should know that there are several ways of getting in. Kew Gardens' visitors usually find it difficult to understand where the entrance is. Actually, Kew Gardens are accessible by a number of gates. Currently, there are four gates that are open to the public: the Elizabeth Gate, which is situated at the west end of Kew Green, and was originally called the Main Gate before being renamed in 2012 to commemorate the Diamond Jubilee of Elizabeth II; the Brentford Gate, which faces the River Thames; the Victoria Gate (named after Queen Victoria), situated in Kew Road, which is also the location of the Visitors' Centre; and the Lion Gate, also situated in Kew Road.

Mobile Phones

When Scotsman Alexander Graham Bell invented the telephone in 1876, it was a revolution in communication. For the first time, people could talk to each other over

great distances almost as clearly as if they were in the same room. Nowadays, though, we increasingly use Bell's invention for taking photographs, accessing the internet or watching video clips rather than talking. Over the last two decades a new means of spoken communication has emerged: the mobile phone.

The modern mobile phone is a more complex version of the two-way radio. Traditional two-way radio was a very limited means of communication. As soon as the users moved out of range of each other's broadcast area, the signal was lost. In the 1940s, researchers began experimenting with the idea of using a number of radio masts located around the countryside to pick up signals from two-way radios. A caller would always be within range of one of the masts; when he moved too far away from one mast, the next mast would pick up the signal. (Scientists referred to each mast's reception area as being a separate 'cell'; this is why in many countries mobile phones are called 'cell phones').

However, 1940s technology was still quite primitive, and the 'telephones' were enormous boxes which had to be transported by car. The first real mobile telephone call was made in 1973 by Dr Martin Cooper, the scientist who invented the modern mobile handset. As soon as his invention was complete, he tested it by calling a rival scientist to announce his success.

Within a decade, mobile phones became available to the public. The streets of modern cities began to feature sharp-suited characters shouting into giant plastic bricks. In Britain the mobile phone quickly became synonymous with the 'yuppie', the new breed of young urban professionals who carried the expensive handsets as status symbols. Around this time many of us swore that we would never, ever own a mobile phone.

But in the mid-90s, something happened. Cheaper handsets and cheaper calling rates meant that, almost overnight, it seemed that everyone had a mobile phone. And the giant plastic bricks of the 80s had evolved into smooth little objects that fitted nicely into pockets and bags. In every pub and restaurant you could hear the bleep and buzz of mobiles ringing and registering messages, occasionally breaking out into primitive versions of the latest pop songs. Cities suddenly had a new, postmodern birdsong.

Moreover, people's timekeeping changed. Younger readers will be amazed to know that, not long ago, people made spoken arrangements to meet at a certain place at a certain time. Once a time and place had been agreed, people met as agreed. Somewhere around the new millennium, this practice started to die out. Meeting times became approximate, subject to change at any moment under the new order of communication: the Short Message Service (SMS) or text message. Going to be

late? Send a text message! It takes much less effort than arriving on time, and it's much less awkward than explaining your lateness face-to-face. It's the perfect communication method for the busy modern lifestyle.

Like email before it, the text message has altered the way we write in English, bringing more abbreviations and a *laxer* approach to language construction. The 160-character limit on text messages has led to a new, abbreviated version of English for fast and instantaneous communication. Traditional rules of grammar and spelling are much less important when you're sitting on the bus, hurriedly typing 'Will B 15min late — C U @ the bar. Sorry! :-)'.

Mobile phones, once the preserve of the high-powered businessperson and the 'yuppie', are now a vital part of daily life for an enormous amount of people. From schoolchildren to pensioners, every section of society has found that it's easier to stay in touch when you've got a mobile. Over the last few years mobiles have become more and more advanced. Firstly, we saw the introduction of built-in cameras, global positioning devices and internet access. More recently we have witnessed the arrival of the 'third generation' of mobile phones: powerful microcomputers with broadband internet access, which will allow us to watch TV, download internet files at high speed and send instant video clips to friends.

Alexander Graham Bell would be amazed if he could see how far the science of telephony has progressed in less than 150 years. If he were around today, he might say:

'That's gr8! But I'm v busy rite now. Will call U 2nite.'

- Why are mobile phones called cell phones in many countries?
 - 1) They are made of special elements called cells.
 - 2) They receive a signal within one radio mast's cell.
 - 3) They were given that name by their inventors.
 - 4) The word 'cell' is derived from the word 'caller'.

Paris and the wonders of a life overseas

I was lucky enough to live in Paris for six months teaching English and in this short time I was able to appreciate the language, culture and brilliance of the city of light.

Befriending locals is always the best way to really experience a new ___ =for the likes of Paris with so many hidden gems around every corner. It is also of course the best way to learn and eventually 33 _____ a language. Speak how the locals do and learn 34 _____ them. Cafés and bars are great places to 35. There you can meet friends and locals, but also relax on your own and grab a drink whilst taking in the atmosphere and language that is being spoken around you.

One of the best things to do in Paris is to explore the area of Montmartre. Montmartre used to be a small village 36 the edge of Paris but is now one of its main attractions and the calling place for aspiring artists. The views of the city from the front of the Sacré Coeur are incredible and will live with you for a lifetime. Winter is a great time to see Paris as the cold air 37 up in your winter coat and scarf and travel the streets and take in its beauty. To add to the views there is on most days entertainment, singing, guitar and I was lucky enough to hear a professional opera singer 38

Раздел 4. Письмо

Для ответов на задания 39 и 40 используйте бланк ответов № 2. Черновые пометки могут делаться прямо на листе с заданиями, или можно использовать отдельный черновик. При выполнении заданий 39 и 40 особое внимание обратите на то, что Ваши ответы будут оиениваться только по записям, сделанным в БЛАНКЕ ОТВЕТОВ № 2. Никакие записи черновика не будут учитываться экспертом. Обратите внимание также на необходимость соблюдения указанного объёма текста. Тексты недостаточного объёма, а также часть текста, превышающая требуемый объём, не оцениваются. Запишите сначала номер задания (39, 40), а затем ответ на него.

39 You have received a letter from your English-speaking pen-friend Ann who writes:

...We moved to a new house a few weeks ago and I changed school. At first I was a bit afraid but I made new friends sooner than I expected. The teachers are nice and everything seems to be working out well. And what about you? Have you made any friends in your new school? Do you enjoy studying there? Have you got any new subjects this year?

I've got to go now! It's time for my music lesson. Drop me a line when you can.

Write a letter to Ann.

In your letter

- answer her questions
- ask 3 questions about her preferences in music

Write 100-140 words. Remember the rules of letter writing.

- 40 Comment one of the following statements.
- **40.1** Domestic appliances improved the quality of our lives.
- **40.2** *Sport is not useful for people.*

What is your opinion? Do you agree with this statement? Write 200–250 words. Use the following plan:

- make an introduction (state the problem)
- express your personal opinion and give 2-3 reasons for your opinion
- express an opposing opinion and give 1-2 reasons for this opposing opinion
- explain why you don't agree with the opposing opinion
- make a conclusion restating your position
